Subject: RE: Meet to discuss a few residue issues

Ray,

Steve Nako and I left you a voice mail message earlier today on this, suggesting you contact David Hrdy on this with respect to the MRLs/tolerances in honey. I have no idea what his is about. To the extent that this involves EFED or bee issues or a specific chemical, CEB would not likely be the appropriate place to talk about this.

With respect to discussions regarding zoning/exchangeability, that would be fine. James and I will both be here.

Sometime in the morning would be fine and we can give you an update. I presume that this meeting would be either by phone or you folks would come here.

David.

Subject: Meet to discuss a few residue issues
Importance: High

David:

A few folks from our Residue Experts Work Group could be in town next Wednesday the 27th, and we are wondering if you and your staff could make time in the morning (suggest 10 or 10:30 a.m.) to discuss a few projects. Please let me know right away, as they would need to make travel arrangements today.

- Preliminary ideas and proposal for MRLs/tolerances in honey;
- Progress on the zoning / exchangeability project.
